

Child Safety

CHILD SAFETY IS OUR PRIMARY GOAL

You have high standards for the products you select for your commercial projects. When you select window coverings, you want them to be functional and high quality. At BEI, we want to ensure the safety of all users, particularly in environments where children may be present.

BEI Window Treatments and Interiors offers many window treatment safety features that have been certified as Best for Kids™ by an independent testing agency. The CPSC urges consumers to choose cordless window coverings, which are the safest option for children. If you have yet to make the necessary changes in your home, or are designing children's rooms, cordless window treatments are always the safest option.

Contact BEI for more information and solutions for your window covering needs.
